

## Welcome to Riccione! Welcome to the Hotel Adlon :-)

Summer 2020 is giving us the opportunity to put ourselves out there and do it with an even higher level of attention than usual.

This is guaranteed by our professionalism and experience, thanks to which we have been offering high quality holidays since 1963.

Here at the Hotel Adlon in Riccione

**Claudio and Chiara Montanari**

### Constant sanitisation

Anyone who has stayed here with us knows that safety has always been a priority. Attention to detail and cleanliness are the first thing we check every day. Now, we have decided to be **even more careful and scrupulous in sanitising the spaces** you visit during your holiday.

We adopt a colour code method for sponges. This means that we have one colour just for the bathrooms, another just for the room surfaces, another just for the glass and another colour just reserved for the floors. We use chlorine and alcohol based cleaning products, which **guarantee safety against viruses and bacteria**. We wash the linen using a professional method and at high temperatures.

We also disinfect all switches and telephones, walk-in closets and home automation pushbuttons every day, for peace of mind.

All the dishes are safe because they are machine washed at temperatures that break down any impurities.

You will notice our cleaning staff pass by more often than usual in the common areas, because we have **intensified our attention to the most frequented areas** of the Adlon.

### Clear and understandable signage

We have placed distance markers and information signs in every room of the hotel, to help you keep your behaviour safer. In this way, you will always know how to get around safely.

## Sanitising gel dispensers

You will find various pump dispensers for disinfecting your hands and sanitising other objects throughout the hotel. It is easy to wash your hands frequently, wherever you are.

The only word you need to keep in mind is "relaxation".

## Eat & Drink

Eating outdoors with the breeze in your hair, enveloped by a sense of freedom: this is the **big innovation for summer 2020** at the Hotel Adlon.

### Picnic on the beach

At lunchtime, **you can take your favourite dish by the sea!** Here at the Hotel Adlon, as of summer 2020, you can sample Chef Oliva's dishes while comfortably seated under your beach umbrella on the shore.

### Lunch and dinner in the garden

Here's another opportunity to eat in the open air! **There is a table waiting for you in the JOY garden,** where meals are very special thanks to the breeze from the sea, the tranquility and large spaces.

### Sea view restaurant

For those who prefer to enjoy meals in the classic way, the sea view room of the Hotel Adlon is so close to the beach that you can smell the sea while you enjoy your favourite dish. The buffet was already protected and now it will be even safer with new protective screens and the assistance of the staff. Together with the kitchen brigade, Chef Oliva will show you the dishes of the day so you can choose your favourite, which will then be served to you safely.

There are fine dining rooms where you can enjoy the serenity of a meal while seated at the table, all of which are arranged with the **proper distance between the tables.**

## Useful Info

### Online check-in

Provide us with the information you need to complete the registration from the comfort of your home. So when you get here, all you need to do is to take the keys and you can go up to your room immediately, without queuing.

### Adlon app

Find all the information you need to make use of the hotel services on your smartphone at all times.

### Covid Manager

There is a contact person at the hotel for all services and information who is competent and constantly updated on everything needed to ensure you have a safe holiday.
